4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

1. *Our Company is party to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.*

Our Company is party to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts, tribunals and forums. Mentioned below are the details of the proceedings pending against our Company as on the date of this Prospectus along with the amount involved, to the extent quantifiable, based on the materiality policy for litigations, as approved by the Company in its Board meeting held on August 12, 2017.

Sr. No.	Nature of Case	No. of Outstanding cases	Amount in dispute/receivable to the extent quantifiable (in ₹) ⁽¹⁾

(a)	Direct Tax- Income Tax	1	4,47,271

⁽¹⁾ *The amounts mentioned above may be subject to additional interest rates and/or penalties being levied by the concerned authorities for delay in making payment or otherwise. Amount of interest and/ or penalty that may be levied is unascertainable as on the date of this Prospectus.*

There can be no assurance that these litigations will be decided in our favour and consequently it may divert the attention of our management and Promoters and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For the details of the cases filed by and against our Company, please refer the chapter titled “*Outstanding Litigations and Material Developments*” on page no. 173 of this Prospectus.

2. *Our Company operates under several regulatory licenses and approvals. Failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations.*

Our Company requires several regulatory licenses and approvals for operating the business. It is subject to a number of transportation laws and regulations which are liable to change based on new legislation and regulatory initiatives. Our Company is required to comply with various regulations in connection with restrictions which specify the actual weight to be carried by our vehicles, permissible emission limits or restrictions on the age of vehicles operating within certain States. Many of these approvals require renewal from time to time. Though the application for renewal of existing licenses/approvals will be made to the respective authorities as and when required, there can be no assurance that the relevant authority will renew any of such licenses/approvals. If our company does not receive the requisite approvals/licenses, our operations may be adversely affected.

Further, these permits, licenses and approvals are subject to several conditions and our Company cannot assure that it shall be able to continuously meet the conditions and this may lead to cancellation, revocation or suspension of relevant permits, licenses and/or approvals. Failure by our Company to renew, maintain or obtain the required permits, licenses or approvals may result in the interruption of our Company’s operations and may have a material impact on our business. For further details regarding statutory approvals, please refer to the chapter titled “*Government and Other Statutory Approvals*” on page no. 180 of this Prospectus.

3. *Our inability to pass on any increase in operating expenses, particularly fuel costs, to our customers which may adversely affect our business and results of operations.*

Fuel costs, toll charges and rent represent some of our major operating costs and an increase in such costs or inability to pass on such increases to our customers will adversely affect our results of operations. Our business is characterised by high fixed costs, principally due to the ownership of goods transportation vehicles. In particular, the cost of fuel has increased in recent years and fluctuates significantly due to various factors beyond our control, including, international prices of crude oil and petroleum products, global and regional demand and supply conditions, geopolitical uncertainties, import cost of crude oil, government policies and regulations and availability of alternative fuels. In fiscal 2015, 2016 and 2017, Lorry running and other incidental expense represented 28.73%, 28.07% and 29.32%, respectively, of our total expenditure. Thus, our results of operation and financial condition depend substantially on the price of fuel.

In addition, the GoI has recently deregulated diesel prices in India removing certain subsidies on diesel prices, and the price of diesel and consequently our fuel cost, have fluctuated significantly in recent periods. Although historically we have generally been able to pass on any increases in the cost of fuel or other operating costs to our customers through periodic increases in our freight rates, there can be no assurance that we will be able to pass on any such increases in the future to our customers either wholly or in part, and our profitability and results of operations may be adversely affected. Further, our Company might not be able to accurately gauge or predict the volatility and trends in fuel price movements which may affect our business plans and prospects, growth estimates, financial condition and results of operations.

4. *We depend upon third parties to provide trucks, based on nature of goods to be transported, volume of orders, and delivery schedules of goods. This may result in increase in cost, delay in delivering the cargo transportation service on time, which in turn may lead to customer dissatisfaction and loss of further business.*

As on July 31, 2017, our Company has a fleet of 229 owned vehicles. However, based on customer preferences, nature of goods to be transported, volume of orders and tight delivery schedules, our Company is dependent on hiring of additional trucks from third parties. If we are unable to secure hired vehicles or other transportation

services or the vehicles / trucks available do not match our size and dimension requirements to meet our commitments to our customers, our operating results could be materially and adversely affected, and our customers could switch to our competitors temporarily or permanently, thereby adversely affecting our business and results of operations and prospects. In fiscal 2015, 2016 and 2017, lorry hire charges represented 38.55%, 37.64% and 36.64%, respectively, of our total expenditure, which in turn resulted in increase in our cost of transportation. Thus, our results of operation and financial condition depend substantially on the hiring of vehicles from outside market, in case of high number of delivery orders.

Further, our Company might not be able to predict the number of trucks required on daily basis, and as such we need to outsource the trucks based on the demand for the delivery of goods, which may affect our business plans and prospects, growth estimates, financial condition and results of operations.

5. *The increase in the age of our vehicles and an increase in the prices of new vehicles may adversely affect our business and results of operations.*

As of March 31, 2017, approximately 50% of our owned goods transportation vehicles were over five years. As the age of our fleet increases, we expect maintenance costs related to our fleet to also increase. We may also have to acquire new vehicles to expand our business or to manage operational efficiencies and reduce cost of maintenance. Unless we continue to expand and upgrade our fleet of goods transportation vehicles and acquire such vehicles on commercially favourable terms, our aging fleet may result in increased operating and maintenance costs.

In case we have to purchase new transportation vehicles / trucks, we will have to incur capital expenditure or avail vehicle loans. We cannot guarantee that we will be able to do so on favourable terms, or in a timely manner, or at all. Further, in case purchase of new vehicles, we will also incur increased depreciation expenses which may adversely affect our results of operations.

6. *Trade Receivables form a substantial part of our current assets and net worth. Failure to manage our trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

We are engaged in goods transportation service for diversified customers. Our business is working capital intensive and hence, trade receivables form a substantial part of our current assets and net worth. The results of operations of our business are dependent on our ability to effectively manage our trade receivables.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

7. *We face intense competition, since our Company operates in a highly competitive industry and competition may have a negative impact on our business prospects, future performance and financial condition.*

Our Company operates in a very fragmented and competitive industry, dominated by a large number of unorganized players. Increased competition may lead to revenue reductions, reduced profit margins, or a loss of market share, any of which could adversely affect our business and results of operations. Transportation industry comprises of both organised and unorganised players in the market. The problem of organized players is compounded by unfair competition with unorganized players.

There are various factors that could impair our ability to maintain our current levels of revenues and profitability in our goods transportation business, including the following:

- competition with other companies offering goods transportation services, some of which may develop a broader coverage network, a wider range of services, and may have greater capital resources than we do;
- reduction by our competitors of their freight rates to gain business, especially during times of declining growth rates in the economy, which may limit our ability to maintain or increase freight rates, maintain our operating margins, or maintain significant growth in our business;
- solicitation by customers of bids from multiple carriers for their transportation needs and the resulting depression of freight rates or loss of business to competitors;

- development of an operational model similar to ours by a competitor with sufficient financial resources and comparable experience in the transportation services industry;
- establishment of better relationships by our competitors with their customers;
- the small unorganized players at a regional level may not comply with applicable statutory and regulatory requirements and due to which they may be able to operate at lower cost and consequently offer lower prices than us; and
- Availability of other alternative modes of goods transportation that directly compete with our routes or geographic regions we cover.

Our Company competes with other goods transportation service providers based on reliability, delivery time, security, visibility, and customer service. Our reputation is based on the level of customer service that we provide. If this level of service deteriorates, or if we are prevented from delivering our services in a timely, reliable, safe, and secure manner, our reputation and business may suffer. Our success also depends on our ability to understand the preferences of our existing and prospective customers.

Our Company's competitors may enjoy potential competitive advantages over us and may successfully attract our customers to their services by matching or exceeding what we offer to our customers, such as:

- greater name/brand recognition, a longer operating history, greater network and wider customer base and extensive international operations;
- start new routes or increase the frequency in the existing routes;
- engage in price competition, reducing the freight rates;
- larger marketing and advertising budgets and resources;
- larger intellectual property portfolios; and
- greater financial, technical and other resources.

There can be no assurance that we will have sufficient resources to respond to competitors' investments in service network and pricing and promotional programs.

If our Company is unable to effectively compete with other participants in the cargo transport industry, whether on the basis of pricing, services or otherwise, it might not be able to attract new customers or retain existing customers, and this could adversely affect our business, financial condition and results of operations.

8. *Our Company has not obtained requisite registration under Motor Transport Workers Act, 1961.*

The Motor Transport Workers Act, 1961 ("MTW Act") applies to every motor transport undertaking employing five or more motor transport workers. Section 2(g) of MTW Act defines 'Motor transport undertaking' as a motor transport undertaking engaged in carrying passengers or goods or both by road for hire or reward, and includes a private carrier. The MTW Act prescribes that such motor transport undertakings should be registered under the MTW Act. Our Company has not obtained any such registration under the MTW Act till date and may be exposed to penalty and action by the government authorities. The penalty provided for contravention of any of the provisions of the MTW Act or any rules made there under prohibiting, restricting or regulating the employment of persons in a motor transport undertaking shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to ₹ 500/-, or with both, and in the case of a continuing contravention with an additional fine which may extend to ₹ 75/- for every day during which such contravention continues after conviction for the first such contravention. In case of delay or failure to obtain the same, it could have an affect our business operations.

9. *Our Company has not obtained local licenses or government approvals required for some of the strategic transshipment hubs / depots used in our operations.*

Our operational infrastructure for the goods transportation business, as of March 31, 2017, comprised of approximately 25 strategic transshipment hubs / depots across various States. The same are operated on a sharing basis with local associates and the rentals are borne by us. Since the strategic transshipment hubs / depots are being used on sharing basis and we do not carry out any billing / revenue activity from such location; we believe that we need not obtain any specific licenses/approval from the local municipal authority in our Company's name for using strategic transshipment hubs / depots on sharing basis. While, we have been operating most of these strategic transshipment hubs / depots for over 10 years and no local department or authority has called upon our Company to obtain such approval / licenses. However, there cannot be any assurance that such authority will not call upon us to comply with the local laws with respect to obtaining approvals/licences and penalise us retrospectively.

- 10. The property used by our Company as transshipment hubs/ depots are not owned by us, and the same are used on sharing basis with local associates. Any adverse impact on the rights of the Licensor/owner or breach of the terms/ non renewal of the agreement/ arrangements as per terms and conditions favourable to us or at all may temporarily impede our operations. Further in case of any disruption, our operations may be materially and adversely affected if we are unable to continue to utilize any of our key transshipment hubs/ depots.**

Our Company has several agency transshipment hubs/ depots across various regions in India which are rented / leased or used on sharing basis with local associates. If such leases are terminated or not renewed at all or renewed on terms which are less favourable to us, our Company may suffer a temporary disruption in operations and alternative premises may not be available at the same or similar costs or locations.

Our business and operations are significantly dependent on the hub-and-spoke operating model and the integrated consignment delivery network built around our transshipment hubs/ depots across India. If we are unable to continue to use our transshipment hubs/ depots which are located on leased premises during the period of the relevant lease or extend such lease on its expiry on commercially acceptable terms, or at all, we may suffer a disruption in our operations which could have a material and adverse effect on our business, results of operations and financial condition.

In addition, some of these leases may not have been registered, which may affect the evidentiary value of such lease agreement in specific performance or other injunctive procedures in a court of law, which could have a material adverse effect on our business, financial condition and results of operations.

- 11. Claims relating to loss or damage to cargo, personal injury claims or other operating risks that are not adequately insured may adversely affect our business, results of operations and financial condition.**

Our business is subject to various risks inherent in the goods and passenger transportation industry, including potential liability to our customers which could result from, among other circumstances, personal injury to passengers or damage to property arising from accidents or incidents involving vehicles operated by us. In addition, some costs like payments to intermediaries, miscellaneous payments made at check posts and relevant authorities may expose us to claims or liability which may not be adequately covered under insurance.

In our goods transportation business, we may be exposed to claims related to cargo loss, theft and damage, property and casualty losses and general liability from our customers. We typically do not secure insurance coverage for the goods transported by us. In the event of any damage or loss of goods, we may be required to compensate our customers. While we endeavour to recover such losses, as well as related loss of freight, by auctioning the damaged goods, there can be no assurance that we will recover any such losses.

Although we attempt to limit and mitigate our liability for thefts and/or damages arising from negligent acts, errors or omissions through contractual provisions and/or insurance, the indemnities set forth in our contracts and/or our insurance may not be enforceable in all instances or the limitations of liability may not protect us from entire liability for damages. While we maintain insurance coverage at levels and for risks that we believe are customary in the goods and passenger transportation industry in India, there can be no assurance that there will not be any claims relating to loss or damage to cargo, personal injury claims or other operating risks that are not adequately insured. There can also be no assurance that the terms of our insurance policies will be adequate to cover any such damage or loss suffered or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Furthermore, any accident or incident involving our vehicles, even if we are fully insured or held not to be liable, could negatively affect our reputation among customers and the public, thereby making it more difficult for us to compete effectively, and could significantly affect the cost and availability of insurance in the future. To the extent that any such uninsured risks materialize, our business, results of operations and financial condition may be materially and adversely affected.

- 12. Our Company is proposing to increase fleet of trucks and consequently also expect demand for qualified drivers to increase. If our Company is unable to attract and retain a sufficient number of qualified drivers, our business, financial condition and results of operations could be adversely affected.**

As our Company is proposing to increase fleet of trucks, our Company has to rely significantly on our drivers. There has been an increase in the demand for qualified drivers in the industry in recent years. Any shortage of drivers could force us to further increase driver compensation alongwith incentives, which could adversely affect

our Company's profitability unless the company is able to offset the increased compensation costs with a corresponding increase in freight rates. In addition, our Company believes that the industry suffers from high turnover of drivers. This high turnover rate requires us to continuously recruit a substantial number of drivers in order to operate vehicles.

If our Company is unable to attract and retain a sufficient number of qualified drivers, we could be forced to increase reliance on hired transportation, decrease the number of pickups and deliveries we are able to make, increase the number of our vehicles or limit growth, any or all of which could have a material adverse effect on our business, financial condition and results of operations.

13. We do not verify the contents of the parcels transported by us, thereby exposing us to the risks associated with the transportation of goods in violation of applicable regulations.

We transport various goods as part of our goods transportation business, other than goods that are classified as hazardous or illegal. While we obtain a declaration from the customer regarding the contents of the parcel and its value, we do not independently verify its contents. We also do not have any equipment to enable us to verify all our consignments prior to loading such consignments on our vehicles. Accordingly, we are unable to guarantee that these parcels do not contain any hazardous or illegal goods. In such circumstances, our vehicles may be confiscated, which could in turn, adversely affect our operations and reputation. In addition, our courier business could involve movement of confidential documents and information, and unauthorized disclosure of such confidential and sensitive information may result in liability for us.

14. Our Company has reported certain negative cash flows from its investing and financing activities, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.

Our Company had reported certain negative cash flows from its investing and financing activities in the previous years as per the restated financial statements and the same are summarized as under:

For details, please refer "Management's Discussion and Analysis of Financial Conditions and Results of Operations of our Company" on page no. 163 of this Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

15. Contingent liabilities could adversely affect our financial condition. Crystallization of any of these contingent liabilities may adversely affect our financial condition.

As of March 31, 2017, our contingent liabilities as indicated in our Restated Financial Statements and also certified by our statutory auditors were as follows:

We believe these claims will be dismissed, But in the event that any of our contingent liabilities materialize, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current fiscal year or in the future. For further information, please refer “Annexure XXVII - Contingent Liability” on page no. 160 of this Prospectus.

17. Our Company has incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.

As on March 31, 2017, we had ₹ 2,732.71 lakhs of outstanding debt on our balance sheet (including current maturities but excluding non-fund based) from various banks and financial institutions. In the event that we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our project or even sell our Company’s movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have sufficient resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate sufficient cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds. Further, our level of indebtedness has important consequences to our Company, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry; affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialise, our business and results of operations may be adversely affected.

18. Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.

Our business, assets and vehicles could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

19. *Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company has entered into certain transactions with our related parties including our Promoter, Promoter Group, Directors and their relatives. While we believe that all such transactions have been conducted on the arm's length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "*Annexure XXV – Related Party Transactions*" on page no. 158 of this Prospectus.

20. *There are various negative covenants in the sanction letters issued to us by our lenders, which could put us at a competitive disadvantage and could have an adverse effect on our business, results of operations and financial condition.*

The sanction letter issued to us contains provisions that restrict our ability to do, among other things, any of the following:

- Changing or alter the Capital Structure of the Company;
- Entering in to borrowing arrangements, with other Banks, Financial Institutions and other parties;
- Entering into amalgamation, reconstruction, re-organisation, takeover or any other schemes of compromise or arrangement;
- Making investment in or giving loans to subordinates, associate concerns, individuals and other parties;
- Paying dividend/making withdrawals, other than out of Current year's earnings after making due provisions.

Further the company has created a charge on its assets in favour of their bankers against the assets of the company. In case of default by the company in repayment of the loans, bankers may exercise their rights over the security, which may be detrimental to the interest of the company. For details, please refer "*Financial Indebtedness*" on page no. 171 of this Prospectus.

Also, we are required to obtain the required consents of the lenders before undertaking certain significant corporate actions. We cannot assure you that the lenders will grant the required approvals in a timely manner, or at all. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. In addition to the restrictions listed above, we are required to maintain certain financial ratios under our financing agreements. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

Additionally, our borrowings are secured by our movable, immovable or tangible assets (whether existing or future) and by a personal guarantee of our Promoter / Promoter Group. Such securities enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, your ownership interest in our Company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost.

If any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

21. *In addition to normal remuneration, other benefits and reimbursement of expenses our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

22. *Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends upon the continued services of our promoters and our ability to attract, train and retain them.*

Our Company is promoted by a group of individuals who have approximate 35 years of experience. The success of our business operations is attributable to our Promoters, Directors and key management personnel. We believe that our relation with our Promoters, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Our founding Promoter, Mr. Narendra Shah, has been actively involved in the day to day operations and management since the incorporation of the Company.

Our Promoters, along with the group key managerial personnel, have over the years built relations with clients, government agencies and other persons who are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

Further, our Promoters have also promoted other companies / firms / ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

23. *Changes in existing emission and vehicle age norms may lead to part or all of our fleet of vehicles becoming un-roadworthy.*

Any change in the existing norms for vehicle emissions and age of vehicles, including implementation of more stringent Bharat Stage V emission norms or a restriction on the use of commercial vehicles above the age of certain years, including pursuant to judicial rulings, revised legislations and international treaties, such as the United Nations Framework Convention on Climate Change, to which India is a signatory, may require us to comply with such stringent norms.

Bharat Stage (BS) III norms have been enforced across the country. In Also Bharat Stage IV emission norms have been in place since April 2010 and it is enforced for whole country from April 2017. In 2016, the Indian government announced that the country would skip the BS-V norms altogether and adopt BS-VI norms by 2020, and further implementation of such higher norms, may lead to some or all of our fleet of vehicles being declared not road-worthy. Further, failure to meet such higher emission norms may also result in some or all of our vehicles becoming declared not road-worthy. There can be no assurance that our vehicles will be able to meet such emission compliance norms partially or at all. Failure to meet such emission norms may cause us to incur

substantial costs in replacement and upgrading of our fleet of vehicle, which may have a material adverse effect on our business and results of operations.

24. *The deployment of the Net Proceeds from the Fresh Issue are based on management estimates and have not been independently appraised by any bank or financial institution and .is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Fresh Issue.*

Our Company intends to primarily use the Net Proceeds from the Fresh Issue towards Working Capital requirement as described in “Objects of the Offer” on page no. 65 of this Prospectus. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Fresh Issue size is not in excess of ₹ 100 crores. The management of our Company will have discretion to use the Net Proceeds from the Fresh Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Fresh Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section “Risk Factors”, may limit or delay our Company's efforts to use the Net Proceeds from the Fresh Issue to achieve profitable growth in its business.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

25. *Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution. Any variation in the utilization of our Net Proceeds as disclosed in this Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.*

The deployment of the funds towards the objects of the Issue is entirely at the discretion of the Board and our Board will monitor the utilisation of Net Proceeds through its Audit Committee. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Offer, at a price and manner as specified in Chapter VI-A of the SEBI ICDR Regulations pursuant to the SEBI ICDR (Second Amendment) Regulations, 2016 dated February 17, 2016. Additionally, the requirement on Promoter or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoter or controlling shareholders from agreeing to the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoter or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI.

Our Company will disclose the utilisation of the Net Proceeds under a separate head along with details in its balance sheet until the Net Proceeds remain unutilised, clearly specifying the purpose for which the Net Proceeds have been utilised. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our operational and financial performance.

26. *We have not made any provisions for decline in value of our Investments*

As on March 31, 2017, we hold investments in Unquoted Equity Instruments and Properties aggregating to ₹ 25.89 lakhs as per Restated Financial Statements. We have not made any provision for the decline in value of these investments and hence as and when these investments are liquidated, we may book losses based on the actual value we can recover for these investments and if lower than the cost, the same could adversely affect our results of operations.

- 27. *Our Company might be unable to meet certain delivery obligations including timelines of delivery, due to which, it could become liable to claims by customers, suffer adverse publicity and incur substantial costs, which in turn could adversely affect our results of operations.***

Many of our orders involve providing services that are critical to the operations of our customers business. Any failure or defect in services could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect. Our Company has commitments for safe and timely delivery of the cargo. Any failure to meet the scheduled timelines set by our customers or loss or damage to cargo may lead to our customers raising claims against us.

Although Our Company is attempting to limit its contractual liability for all the damages, including consequential damages, while rendering the services, our Company cannot be assured that the limitations on liability it provides for, in the service contracts will be enforceable in all cases.

- 28. *Any infringement of our registered corporate logo  or failure to protect it may adversely affect our business.***

Our corporate logo  is registered with the Registrar of Trademarks under Trademark No. 1618014. Given the nature of our services, we cannot assure you that our corporate logo will not be infringed by our competitors and third parties, which may expose us to expensive legal proceedings and the same can have an adverse effect on our business, results of operations and financial condition. The infringement of our registered trademark might also lead to our Company losing business to such competitors and might adversely affect our goodwill. For further details please refer to section titled “Government and Other Approvals” beginning on page no. 180 of this Prospectus.

- 29. *Our Promoters have extended personal guarantees in connection with certain of our debt facilities. There can be no assurance that such personal guarantees will be continued to be provided by our Promoters in the future or can be called at any time, affecting the financial.***

Our Promoters have provided personal guarantees for our borrowings to secure our loans. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company’s borrowings.

- 30. *We have not identified any alternate source of raising the funds mentioned as our ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

Our Company has not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds for setting up the denim processing unit or may result in us borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company.

- 31. *Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.***

The current Issue includes fresh issue of Equity Shares and Offer for Sale by our Promoters and Promoter Group. Our Promoter and Promoter Group may beneficially own approximately 72.70% of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company’s best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may

have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

32. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

33. *The transport industry is affected by numerous factors that are out of our control. Majorly, our business is dependent on the road network and inability to tackle the same or any disruptions or delays in this regard could adversely affect us and lead to a loss of reputation and/ or profitability.*

Our business operations in the goods transportation business are dependent on the road network. Operations in the transport industry are affected by numerous factors, including traffic conditions, road closures, construction-related and other delays. Further, time-consuming and complex border-crossing (inter-state) procedures cause significant journey time delays and poor journey time reliability on road movements.

Also, there are various factors which affect road transport such as political unrest, bad weather conditions, natural calamities, regional disturbances, fatigue or exhaustion of drivers, improper conduct of the drivers/ motormen, accidents or mishaps and third party negligence. Also, any such interruption or disruptions could cause delays in the delivery of our consignments to their destination. Further, such delays may cause a loss of reputation, which, over a period of time could lead to a decline in business. In the event that the goods to be delivered may have a short shelf life, and any delay in the delivery of such cargo could also expose us to additional losses and claims. Although, some of these risks are beyond our control, we may still be liable for the condition of such cargo and their timely delivery.

These events cause additional costs, both in terms of actual fees and charges for services provided, and as a result of time delays and unreliability in delivery. Our Company cannot assure you that these factors and conditions will not delay the transportation and delivery of cargo and impact our ability to operate without disruption or otherwise have a material adverse effect on our business, financial condition and results of operations.

34. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

35. *Our success depends on our ability to maintain costs at low levels, and generate sufficient freight volumes to achieve acceptable profit margins or avoid losses.*

Our business is characterized by high fixed costs, principally due to the ownership of vehicles. These high fixed costs do not vary significantly with variations in freight volumes and a relatively small change in freight volumes or freight rates can have a significant effect on operating and financial results. Our Company seeks to maximize

revenue per operating vehicle, such that it optimizes per our cost. However, difficulties with internal processes or other external adverse influences could lead to shortfalls in revenue. As a result, the success of business depends on our ability to successfully control and reduce costs in addition to optimizing freight volumes and revenues. If our Company is unable to succeed at any of these tasks, and may not be able to recover the fixed costs of operations or achieve acceptable operating or net profit margins, our business, results of operations and financial condition could be adversely affected.

36. We constantly face a credit risk which may in turn affect our complete cycle adversely. Also, any customer dispute regarding our performance or workmanship may amount in delay or withholding of payment to us.

Our Company provides logistics services along with ancillary services to our customer according to their requirement. As transportation service providers, our primary competence is the ability to provide timely deliveries and services, further being able to exploit the benefits of economies of scale and credit shortage in the industry. Our business cycle is heavily dependent on timely payments being received from our customers. In case that our service of transportation and other services does not fulfill the requirements of our customer which may leads to dissatisfaction and further consequence including customer dispute regarding our performance or workmanship and the customer may delay or withhold payment to us, which may result in materially affecting our business.

In case of such default in payment/ unforeseeable delay in payment from any of our customers our working capital cycle will be adversely affected. This may lead to lack of competitive advantage against various other transporters leading to an adverse effect on our business operations and profitability.

37. Our cargo transport business is subject to certain taxes, and any increase in rates may significantly affect our Profitability. Also, our Company might source vehicles from various States and thus are exposed to different tax regimes that may affect our costs and profitability of the Company.

Our Cargo Transport business has a multiplicity of taxes as taxes are levied at the Union level, State level and at the local administration level. The various taxes includes: National Tax by the Union Government; Motor Vehicle Tax, and Goods Tax by the State Government and Tolls by the Local Body. Apart from this, our Company also have to pay National Tax every year for each of the owned vehicles to the Central Government.

Our Company is intending to increase fleet size of owned vehicles, so we may source these vehicles from various States and may be exposed to different tax regimes in different States, which may adversely affect our costs and profitability.

Any increase in rates of any of these taxes and our inability to pass on the same to our customers may adversely affect our profitability.

38. Any disproportionate increase in labour costs including increase in wage / salary demand, labour unrest or labour claims arising from accidents may adversely affect our business operations and financial conditions.

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labour unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

39. Our success largely depends on our ability to attract and retain our Key Managerial Personnel. Any loss of our Key Managerial Personnel could adversely affect our business, operations and financial condition.

Our Company is depending significantly on the expertise, experience, and continued efforts of our Key Managerial Personnel. If one or more members of our Key Managerial Personnel are unable or unwilling to continue in his/her present position, it may be difficult to find a replacement, and business might thereby be adversely affected. Our industry requires personnel with specific technical knowledge and experience for our software development and software services.

Competition for Key Managerial Personnel in our industry is intense and it is possible that our Company may not be able to retain existing Key Managerial Personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel could adversely affect our business, results of

operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled “Our Management” beginning on page no. 110 of this Prospectus.

40. *The rate of interest for the loans obtained by us from the banks is variable and any increase in interest rates may adversely affect our results of operations and financial condition.*

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company’s credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled “Financial Indebtedness” on page no. 171 of this Prospectus. Further, in recent years, the Government of India has taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

41. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a quarterly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

RISK FACTORS RELATED TO EQUITY SHARES

42. *Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the investors’ shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

43. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Prospectus;
- Strategic actions by us or our competitors;

- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of transport sector companies generally;
- Performance of our competitors in the Transportation service industry and the perception in the market about investments in the Transportation service sector;
- Significant developments in the regulation of the Transportation industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalisation and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

44. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

45. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our Subsidiary and the dividends they distribute to us. In the past, we have not made dividend payments to the Shareholders of our Company. The Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

46. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be

liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

EXTERNAL RISK FACTORS

47. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

48. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “Key Industry Regulations and Policies” beginning on page no. 100 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse affect on our business, financial condition and results of operations.

49. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. The GoI has proposed a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which

is effective from July 1, 2017. While the GoI and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

Further, the General Anti Avoidance Rules ("GAAR") are proposed to be made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

We have not determined the impact of these proposed legislations on our business. Uncertainty in the applicability, Interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, the GoI may introduce a waiver or incentive scheme in relation to specific population segments such as MSEs in public interest, pursuant to which we may be required to Issue our products and services at discounted rates. This may affect our business and results of operations.

50. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

51. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

52. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us,

thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

53. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

54. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

55. *We will prepare our financial statements from April 1, 2018 onwards under the Indian Accounting Standards ("Ind AS"). As Ind AS is different in many respects from Indian GAAP, our financial statements from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes. In addition, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.*

We currently prepare our financial statements under Indian GAAP. The Companies (Indian Accounting Standards) Rules, 2015 ("IAS Rules"), as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, enacted changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The IAS Rules provide that the financial statements of the companies to which they apply shall be prepared and audited in accordance with Ind AS. Ind AS is different in many respects from Indian GAAP. All NBFCs and HFCs having a net worth of more than ₹ 5,000.00 million are required to mandatorily adopt Ind AS for the accounting period beginning from April 1, 2017, with comparatives for the period ending on March 31, 2017. Although any company may voluntarily implement Ind AS for the accounting period beginning from April 1, 2015, we intend to implement Ind AS for the accounting period beginning from April 1, 2018. As there is not yet a significant body of established practice, such as interpretations of Ind AS, on which to draw in forming judgments regarding the Ind AS implementation and application, we have not determined with any degree of certainty the impact the adoption of Ind AS will have on our financial statements. However, we know that the Ind AS will change our methodology for estimating allowances for doubtful debt losses. Ind AS will require us to value our NPAs by reference to their market value (if a ready market for such loans exists) or to calculate the present value of the expected future cash flows realisable from our loans, including the possible liquidation of collateral (discounted at the loan's effective interest rate) in estimating allowances for doubtful debt losses. This may result in us recognising higher allowances for doubtful debt losses in the future, which will adversely affect our results of our operations. Accordingly, our financial statements for the period commencing from April 1, 2017 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes.

In our transition to Ind AS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. Our management may also have to divert significant time and additional resources in order to implement Ind AS on a timely and successful basis. Moreover, there is increasing competition for the small number of Ind AS experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Therefore, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

OVERVIEW OF THE INDIAN ECONOMY

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). The Government of India has forecasted that the Indian economy will grow by 7.1 per cent in FY 2016-17. As per the Economic Survey 2016-17, the Indian economy should grow between 6.75 and 7.5 per cent in FY 2017-18. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

India's gross domestic product (GDP) grew by 7 per cent year-on-year in October-December 2016 quarter, which is the strongest among G-20 countries, as per Organisation for Economic Co-operation and Development (OECD) Economic Survey of India, 2017. According to IMF World Economic Outlook Update (January 2017), Indian economy is expected to grow at 7.2 per cent during FY 2016-17 and further accelerate to 7.7 per cent during FY 2017-18.

The Union Budget, 2017-18 deferred the target for the gross fiscal deficit (GFD) to GDP ratio of 3.0 per cent to 2018-19 from 2017-18. Nevertheless, the government remained committed to the spirit of fiscal consolidation as the Centre's GFD is budgeted to decline by 0.3 percentage point to 3.2 per cent in 2017-18 through an increase in non-debt receipts, particularly tax revenues and disinvestment proceeds. This makes room for enhanced budgetary allocation for the farm and rural sectors, social and physical infrastructure, and employment generation. Future fiscal consolidation is contingent upon efficient revenue mobilisation - broadening the tax base; and incentivising digital payments.

It is hence our strategy to raise funds from this issue and augment our fund based working capital capabilities. We believe that companies with high liquidity on their balance sheet would be able to better exploit market opportunities in short term as well as longer duration services in our business. Our Company may also explore possibilities for utilising the available capital to increase physical presence by setting-up offices/ agency offices/ depots/ warehouses in various regions in India in the future. For further details regarding the working capital being raised through this Issue, please refer to section “*Objects of the Offer*” on page no. 65 of the Prospectus.

Strategic Initiatives for expansion of goods transportation network

We intend to set up offices / branches / godowns / depots at various diversified geographical locations which will serve as a strategic initiative for expansion of our pan-India network of branches and agencies for our goods transportation business. We also intend to add a significant number of branches in northern regions of India as well as increase the depth of our existing network in key regions. This will help us in adding more routes to our operations of various services provided over a broad range of distances.

Develop a network of owned transshipment hubs

We intend to set up owned transshipment hubs at strategic locations across India to ensure stability for our future operational network. Our long term strategy includes owning a large network of transshipment hubs, such that a wider area is accessible for our transport services. These hubs also enable us to increase our customer base in existing and new locations thus strengthening our Company’s name in the transportation industry. The availability of owned transshipment hubs will also enable us to better plan future expansion of our operating facilities and network.

Further increase our fleet size

As part of our expansion strategy, we intend to further expand our fleet of owned trucks. Our Company operates with a fleet of 229 owned vehicles along with more than 500 outsourced trucks, which includes trucks of varying lengths and varying load capacities. For details regarding fleets owned by us, please refer "*Vehicle Fleet Strength*" on page no. 95 of this Prospectus. With a larger fleet, we will be able to cover larger number of routes, which will help us to grow at exponential pace.

Concentrated to new arenas of service

With increasing road infrastructure, our Company intends to expand the Cargo Business. Our Company intends to set up warehouses in western regions of India to gain advantage of increased demand for warehousing facilities to the customers for storage of their cargo/ goods. We also intend to enter into temperature controlled services and ambient distribution business segment i.e. we plan to own refrigerated freezer trucks and arrange for the transportation of the customers products from point of sourcing through Reefer Vehicles or ambient distribution vehicles.

Operation Excellence

We continue to invest in operational excellence through continuous process improvement, customer service etc. We maintain our commitment to time bound service, safety and quality of the transportation of cargo / goods. DETAILS OF THE FUND REQUIREMENTS

1. Funding Working Capital Requirements:

We operate as a Pan-India surface logistics and parcel delivery service provider. We provide various transportation services like: Full Truck Load Transport Services, Parcel and Part Truck Load Services/ less than Truck Load (LTL), Import- Export Services and Bonded Trucking Services.

Our operational infrastructure for the goods transportation business has a growing network of offices, franchise offices/ depots/ agency offices, spread across the various regions of the country, which serves as strategic transshipment hubs for our operations. We own and operate a strong fleet of commercial vehicles consisting of more than 240 owned trucks and more than 500 outsourced trucks. We operate different types of trucks on the basis of design and size along with varying capacities.

Due to intense competition in this industry, from the organised as well from the unorganised sector, we cannot always dictate payment terms with our customers and suppliers. Also, many of our customers are big corporate houses and various national and international airlines. Thus, our current credit period is very considerably high and not uniform for different customers. Further, recent volatility in the global economy and the subsequent volatility of economic activity in India, various companies for whom we transport goods and cargo, and also various airlines for whom we offer our bonded trucking services, have been facing liquidity pressures and if the same were to continue we may not be able to reduce the credit period to our customers substantially in order to reduce our working capital gap. This is one of the major reasons for increase in our working capital requirements.

⁽²⁾ M/s. Sanjay C. Shah & Associates, Chartered Accountants vide letter dated August 11, 2017 have confirmed that the Company’s “Internal Accruals” as on March 31, 2017 aggregates to ₹ 4,138.11 lakhs, and the Company’s “Own Funds” as on March 31, 2017 aggregates to ₹ 4,467.13 lakhs.

Hence, our Company proposes to utilise ₹ 195.50 lakhs of the Net Fresh Issue Proceeds towards working capital requirements for meeting our future business requirements.

Justification for “Holding Period” levels

Trade Receivables	Our Company operates in a highly competitive environment, including the organised and unorganised sector. Over the years we have acquired large national and international customers and have maintained cordial relations with all our customers. Due to this we expect to negotiate better terms with them for our future transactions. Though, high value customers like international air carriers, government agencies, generally have fixed payment terms, we expect to part of their preferred service provider giving us better credibility. Hence we believe that going ahead we will witness an average of 80-85 days credit period in the fiscal 2017-18.
Loans & Advances	This amount includes various deposits, advance taxes and amount given as loans to our employees. Though other advances will be proportionate to the business operations, we believe that our employee loans will be duly repaid and also new loans will reduce over time. Currently, we have approximately 8% of our cost of sales as total outstanding loans & advances and we believe the same to lower at 4% for the F. Y. 2017-18.
Creditors	Trade Payables are mainly for lorry hire payables and payables for fuel, spares, utilities, etc. To avail vehicle services, repairs, fuel etc. as and when required, we need to maintain good relations with our suppliers and hence we do not keep a large credit period and generally pay the same within approximately 15 days. However, we further intend to keep the creditor’s period short in order to gain advantage of priority service and hence we estimate the creditor’s period to be paid within 10 days.

2) General Corporate Purposes

We propose to deploy ₹ 51.70 lakhs, aggregating to 20.91% of the Net Proceeds of the Fresh Issue towards general corporate purposes, including but not restricted to strategic initiatives, partnerships, joint ventures and acquisitions, meeting exigencies which our Company may face in the ordinary course of business, to renovate and refurbish certain of our existing Company owned/leased and operated facilities or premises, towards brand promotion activities or any other purposes as may be approved by our Board.

We confirm that any offer related expenses shall not be considered as a part of General Corporate Purpose. Further, we confirm that the amount for general corporate purposes, as mentioned in this Prospectus, shall not exceed 25% of the amount raised by our Company through this Offer.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

The US economy bounced back strongly in Q3:2016, underpinned by robust consumer spending and continuing improvement in the labour market. GDP growth decelerated sharply in Q4:2016 due to a large slippage in net exports, even though retail sales, consumer confidence and the purchasing manufacturers' index (PMI) suggested sustained momentum. Domestic demand grew (q-o-q) at the fastest pace in almost two years. Consumer confidence reached a 16-year high in March, though retail sales had slowed down in February. The Institute for Supply Management's (ISM) index suggested manufacturing expanded at its fastest pace in three years in February.

In the Euro area, GDP growth accelerated in H2:2016. Relatively low oil prices and sustained employment gains have provided support to household incomes. Improving consumer confidence and the PMI, which rose to a six-year high in March, indicate that activity continued to expand in Q1:2017. Nonetheless, the region remains vulnerable to a number of headwinds such as the formal beginning of the Brexit process, upcoming elections in several constituent countries and tightening of financial conditions.

The Japanese economy continued to recover at a modest pace even as the momentum weakened in H2:2016. Increases in private consumption and fixed investment were moderate, although there was some uptick in exports and industrial production towards end-2016. The manufacturing PMI improved during January and February but moderated again in March 2017.

In the UK, economic growth gained momentum in H2: 2016, notwithstanding the uncertainties surrounding the negotiations relating to Brexit, as exports rose substantially following the weakening of the pound. However, manufacturing growth weakened for two consecutive months in February, indicating the possibility of a slowdown in 2017

Global activity is firming broadly as expected. Manufacturing and trade are picking up, confidence is improving, and international financing conditions remain benign. Global growth is projected to strengthen to 2.7 percent in 2017 and 2.9 percent in 2018-19, in line with January forecasts. In emerging market and developing economies (EMDEs), growth is predicted to recover to 4.1 percent in 2017 and reach an average of 4.6 percent in 2018-19, as obstacles to growth in commodity exporters diminish, while activity in commodity importers continues to be robust. Risks to the global outlook remain tilted to the downside. These include increased trade protectionism, elevated economic policy uncertainty, the possibility of financial market disruptions, and, over the longer term, weaker potential growth. A policy priority for EMDEs is to rebuild monetary and fiscal space that could be drawn on were such risks to materialize. Over the longer term, structural policies that support investment and trade are critical to boost productivity and potential growth.

Indian Scenario

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). The Government of India has forecasted that the Indian economy will grow by 7.1 per cent in FY 2016-17. As per the Economic Survey 2016-17, the Indian economy should grow between 6.75 and 7.5 per cent in FY 2017-18. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

India's consumer confidence index stood at 136 in the fourth quarter of 2016, topping the global list of countries on the same parameter, as a result of strong consumer sentiment, according to market research agency, Nielsen.

(Source: <https://www.ibef.org/economy/indian-economy-overview>)

India's gross domestic product (GDP) grew by 7 per cent year-on-year in October-December 2016 quarter, which is the strongest among G-20 countries, as per Organisation for Economic Co-operation and Development (OECD) Economic Survey of India, 2017. According to IMF World Economic Outlook Update (January 2017), Indian economy is expected to grow at 7.2 per cent during FY 2016-17 and further accelerate to 7.7 per cent during FY 2017-18.

The Union Budget, 2017-18 deferred the target for the gross fiscal deficit (GFD) to GDP ratio of 3.0 per cent to 2018-19 from 2017-18. Nevertheless, the government remained committed to the spirit of fiscal consolidation as the Centre's GFD is budgeted to decline by 0.3 percentage point to 3.2 per cent in 2017-18 through an increase in non-debt receipts, particularly tax revenues and disinvestment proceeds. This makes room for enhanced budgetary allocation for the farm and rural sectors, social and physical infrastructure, and employment generation. Future fiscal consolidation is contingent upon efficient revenue mobilisation - broadening the tax base; and incentivising digital payments.

The growth of the global logistics market is directly related to the development of international trade flow and the current economic environment. Asia Pacific and North America appear to be the most attractive markets for logistics, particularly when it comes to contract service such as third-party logistics. The global logistics market to grow at a CAGR of 6.54% during the period 2017-2021.

The report covers the present scenario and the growth prospects of the global logistics market for 2017-2021. To calculate the market size, the report considers the revenue generated by different vendors through the sales of logistics services to various industries that include manufacturing, consumer goods, F&B, automotive, and others. There are three major logistics model under global logistics, namely, second-party logistics (2PL), third-party logistics (3PL), and fourth-party logistics (4PL). The report also includes a discussion of the key vendors operating in this market.

One trend in market is dominance of integrated service providers. The logistics market is witnessing the development of integrators. The market is characterized by vendors that are engaged in providing either non-asset-type or asset-type services. However, integrators are a combination of both non-asset-type and asset-type providers.

In the wake of globalization, the importance of logistics is increasing as more and more, both national and multi-national companies are sourcing, manufacturing and distributing their products and services on a global scale. Thus, the recognition of performance of logistics industry would become prime importance of economic development for India in long term. Favourable government trade policies have resulted in an increased demand for logistics services to keep pace with the increased logistics needs of importers and exporters which provides opportunity for expansion to the existing vendors.

INDIAN SCENARIO

The Indian logistic industry has been gaining traction, with e-commerce penetration, economy revival, proposed GST implementation and government initiatives like “Make in India”, National Integrated Logistic Policy, 100% FDI in warehouses and food storage facilities, etc. Some of the aforementioned initiatives during FY12-FY16 (refers to the period April 1 to March 31) have led to significant improvement in functioning and operations of logistics companies in India which is reflected in multiple notching up of India’s logistic performance index (LPI) rank by 19 places to 35th position from 54th position as per LPI 2016 report by World Bank. Furthermore, with respect to India’s GDP growth the logistics industry is expected to grow at 1-1.5x as logistics business is directly correlated with economic activity. Considering the aforementioned aspect the Indian logistic industry is projected to grow at a CAGR of 15-20% during FY16~FY20.

INDUSTRY STRUCTURE

The Indian logistics sector is primarily categorized into four segments comprising:

1. Transportation (rail, road, air, water-ways)
2. Warehousing (Container freight stations and Inland Container Depots)
3. Freight Forwarding
3. Value Added Services

(Source: Indian Logistics Industry gaining the traction Report for August, 2016 by CARE Ratings)

TRANSPORTATION

The transportation contributes maximum (60%) to the whole pie of logistic sector which comprises of various means such as road, rail, air and water. India being emerging country is primarily dependent upon transportation through land, i.e., road and rail. The transportation through road and rail together contributes about 56% followed by Warehousing 24.5% comprising industrial and agricultural storage in the entire pie of logistics segment.

The following table illustrates the logistics flow through various means such as Air, Water, Road and Rail in India, China, US and Europe

The road freight transportation services industry is large, fragmented and highly competitive. It broadly consists of players who provide transportation services, intermediaries (such as, transport contractors and booking agents) who offer haulage services, brokers supplying equipment, drivers who work for a commission and finally the consignors or end-users constituting the ultimate demand for the services.

ROAD TRANSPORTATION

Road transportation has gradually increased over the years with the improvement in connectivity between cities, towns and villages in the country. In FY16, India had the 2nd largest road network in the world, spanning over a total of 5.23 million kilometres. Over 64.5 per cent of all goods in the country are transported through roads, while, 85.9 per cent of the total passenger traffic uses road network to commute. Roads constitute about 80 per cent of the country's passenger traffic & 65 per cent of freight traffic. National highways account for 1.9 per cent of the total road network in India.

(Source: ibef.org – May 2017)

Indian road network is second largest in the world with 33 lakh Km. About 65% of freight and 80% passenger traffic is carried by the roads. National Highways constitute only about 1.7% of the road network but carry about 40% of the total road traffic. Number of vehicles has been growing at an average pace of 10.16% per annum over the last five years.

Indian road network of 33 lakh Km. is second largest in the world and consists of :

Trend in Freight rates:

Freight rates have not moved in line with recovery in diesel prices owing to low cargo availability. As a result of low demand from key sectors, freight rates have also not kept pace with the increase in diesel prices over the past 4-6 months.

Source: TCI, IOCL, ICRA research

(Source: Indian Commercial Vehicle Industry Report by ICRA Research Services)

Since April 2016, diesel prices have recovered by 16%, while freight rates have increased by only 3-4%. The Index of Road Freight (RFI) indicates a marginal increase in freight rates during this period. As a result of higher diesel cost, the profitability of fleet operators has also come under pressure on a sequential basis. However, in comparison to the past couple of years, the current situation is much better.

Freight rates on select routes have risen by 7-9% owing to increase in diesel prices and festive season.

Trend in Round-Trip Freight Rates for 15T Payload Trucks across Key Routes is as below:

Factors contributing to performance of transport sector:

The value of roads and bridges infrastructure in India is projected to grow at a Compound Annual Growth Rate (CAGR) of 17.4 per cent over FY12-17. The country's roads and bridges infrastructure, which was valued at US\$ 6.9 billion in 2009 is expected to touch US\$ 19.2 billion by 2017.

The construction of highways had reached an all-time high of 6,029 km during FY 2015-16, and the increased pace of construction is expected to continue for the coming years. The financial outlay for road transport and highways grew at a CAGR of 12.5 per cent between FY2010-2016. The plan outlay for FY2016-17 stepped up budgetary support for Road Transport and Highways to Rs 97,000 crore (US\$ 14.46 billion).

Road Development

The Ministry has been entrusted with the responsibility of development of Road Transport and Highways in general and construction & maintenance of National Highways (NHs) in particular. All roads other than National Highways in the states fall within the jurisdiction of respective State Governments. In order to assist the State Governments in the

development of state roads, Central Government also provides financial assistance out of the Central Road Fund (CRF) and Inter State Connectivity and Economic Importance (ISC & EI) scheme. Besides National Highways Development Project (NHDP) & National Highway Interconnectivity Improvement Programme (NHIIP), Ministry is implementing SARDP-NE & LWE schemes which includes National Highways and State roads. The Ministry is also responsible for evolving standards and specifications for roads and bridges in the country besides acting as a repository of technical information on roads and bridges.

Key Challenges for Logistics Industry

India, despite being a low-cost country, has higher logistics cost due to various issues and challenges faced by the industry. Apart from being entangled in complex tax structure the industry is also affected by poor rate of customs efficiency of clearance processes and procedures thus affecting the international export logistics stratum. Furthermore, sub-optimal comfort provided by the existing Indian infrastructure combined with lack of implementation of efficient IT-enabled tracking and tracing mechanisms has affected the performance of logistics. A country's competitiveness is measured by the ease of doing business. India stands at 35th position in the logistics performance index (LPI) amongst 160 countries around the world, with Germany on top, Singapore, China and United States of America in 5th, 9th, and 10th positions, respectively, as per the World Bank report 2016.

(Source: Indian Logistics Industry gaining the traction Report for August, 2016 by CARE Ratings)

Following table illustrates LPI of various countries based on various parameters:

Country	LPI Rank	Customs	Infrastructure	International shipments	Logistics competence	Tracking & tracing	Timeliness
Germany	1	2	1	8	1	3	2
Singapore	5	1	6	5	5	10	6
Hong Kong, China	9	7	10	2	11	14	9
United States	10	16	8	19	8	5	11
Japan	12	11	11	13	12	13	15
South Africa	20	18	21	23	22	17	24
India - 2016	35	38	36	39	32	33	42
India - 2014	54	65	58	44	52	57	51
Brazil	55	62	47	72	50	45	66
Russian Federation	99	141	94	115	72	90	87

(Source: Indian Logistics Industry gaining the traction Report for August, 2016 by CARE Ratings)

India's logistics performance has seen a rise in all the six key performance indicators used to compute international LPI. The factors which led to growth in improvement of LPI includes increase in infrastructure (especially Road,

Railways and Ports) spending along with their successful commissioning, growth in investments and participation of international logistics players in Indian firms which attracted better technology along with rise in international shipments coupled with leveraging the established network of the investor and implementation of effective IT systems used for tracking and tracing the goods.

Government Initiatives

A total of 6,604 km out of the 15,000 km of target set for national highways in 2016-17 has been constructed by the end of February 2017, according to the Minister of State for Road, Transport & Highways, Government of India.

In the Union Budget 2017-18, the Government of India has allotted Rs 64,000 crore (US\$ 9.55 billion) to NHAI for roads and highways and Rs 27000 crore (US\$ 4.03 billion) for PMGSY.

Key Investments/Developments

- The Road Transport & Highways Ministry has invested around Rs 3.17 trillion (US\$ 47.55 billion), while the Shipping Ministry has invested around Rs 80,000 crore (US\$ 12.0 billion) in the past two and a half years for building world class highways and shipping infrastructure in the country.
- The Ministry of Road Transport and Highways and NHAI plan to take up 82 highway development projects under the Bharatmala project, which would help in improving connectivity to both major as well as minor ports in the country.
- The Cabinet Committee on Economic Affairs (CCEA) has authorised the NHAI to monetise 75 publicly funded highway projects of value Rs 35,600 crore (US\$ 5.34 billion) via toll-operate-transfer (TOT) mode which will fetch adequate funds to finance road construction of 2,700 km length of roads.
- The Government of India plans to invest Rs 3 trillion (US\$ 44.73 billion) for developing 35,000 km of roads across the country, of which 21,000 km will be economic corridors and 14,000 km will be feeder routes, which is expected to improve freight movement, ease traffic bottlenecks and improve inter-city connectivity in the country.
- CCEA has approved a hybrid annuity model for implementing highway projects, which adopts a more rational approach to allocation of risks between the government and the private developer, and is hence expected to revive highway projects construction in India.
- With the objective of reviving private investment in the roads sector, the Ministry of Roads and Highways is now working on two more models for attracting capital. One model proposes allowing bidding of a road project on the basis of the least present value, and the other envisages selling off road projects that have been built using government funds.

FUTURE PROSPECTS OF TRANSPORTATION IN ROAD SECTOR

(Source: <https://www.ibef.org>)

In India, roads remain the most important means of Total vehicle's growth (million units) transport, accounting for around 80 per cent of the passenger traffic & 65 per cent of the freight traffic. Number of total vehicles in India increased at a CAGR of 9.4 per cent during the period of FY06-16, from 9.7 million to 23.9 million. As of FY16, 2 wheelers accounted for 78.6 per cent of the total number of vehicles in India

The government, through a series of initiatives, is working on policies to attract significant investor interest. The Indian government plans to develop a total of 66,117 km of roads under different programmes such as National Highways Development Project (NHDP), Special Accelerated Road Development Programme in North East (SARDP-NE) and Left Wing Extremism (LWE). The government has identified development of 2,000 km of coastal roads to improve the connectivity between ports and remote villages.

These solutions are designed to manage inbound and outbound logistics activities, thereby allowing customers to concentrate on their core competencies.

Under our FTL and LTL Services, once the customer places an order, our delivery trucks arrange to pick up the cargo from the customer's door step (home / office / factory / godown).The unloading and clearing of cargo is done at the destination of the ultimate consignee by the concerned party itself.

In case of Parcel Delivery, the customer drop their parcel at our godowns allocated for this service specifically in the western regions of India. This Cargo/ parcel is weighed and sorted according to area and priority. The Cargo/ Parcel is checked for quality and quantity status. The Parcel consignments are then transferred to our nearest depot for loading in the trucks. As part of our customer service initiative, in majority cases, we deliver the consignments at the doorstep of the customers.

Ltd., & Samsung India Electronics Pvt. Ltd. to name a few. We provide our customers with a wide range of parcel sizes, weights and types of freight over a broad range of distances taking into consideration the needs of every customer.

Customs Bonded Trucking

Bonded Trucking was relatively a new concept, introduced in India in the year 2000. There are comparatively few players in the Bonded Trucking business in India, mainly due to involvement of huge investment, bank guarantees etc. for facilitation of this service. Bonded Trucking is very cost effective when compared to air movement domestically. With our wide network of operations, we provide this service to all custom notified air cargo complexes across India. Generally, the standard size container trucks are available for regular transport. The typical size of a standard container is 20ft Length, 7.5ft Height and 7.5ft Breadth with maximum Loadable capacity of 8 tonnes and volume of 28 to 30 cubic meter (CBM). In case of a non-standard size cargo i.e. mainly larger than normal truck sizes, the airlines or agents give us the cargo dimensions in advance, so that we can make all possible special arrangements to transport the same.

Upon verification, the trucks are loaded with the custom sealed cargo from one airport customs office for transporting to the designated customs office of another airport, where the goods are unloaded after re-verifying the same. The process of loading and unloading of goods is done under the supervision of the customs officer. We provide this service for both import export consignments. We have contracts with various Airlines and Air Transport agencies for providing our Bonded Trucking Services.

Full-Truck Load Services (FTL Services).

We provide FTL services across India, with major concentration in the southern India regions and routes. We have experienced higher transportation business in the southern region. This continuous business from new and repeat customers enables us to avoid empty return of vehicles and optimal use of load factor or capacity utilization of our vehicles.

We provide door-to-door FTL services to our customers, in which the goods are loaded on to our vehicles at the premises of the customer and then delivered to the destination as specified by the customer. This service is typically used by the customers who are looking to move high value or heavy haul items across long distances, especially in bulk viz. manufacturers, wholesalers etc. Our trucks ships goods exclusively when required by the customer and as per the specifications of the customer. This service is offered at a pre-determined rate.

Part-Truck Load (LTL Services)

We provide Part-Truck Load/ LTL services, especially for the convenience of the customers desiring to transport medium size goods or smaller loads between destinations across India. This service is typically availed by the customers like retailers

Cargo/ goods are collected from different consignor's premises in a tempo/ smaller vehicle based on the load size. This cargo is collectively gathered at the godown in Mumbai which serves as the central warehouse. Further the cargo is sorted on the basis of nature of goods, quantity, and destination and accordingly loaded on to our vehicles for further transportation. This cargo/ goods are ultimately delivered at the premises of the customer (consignee), as per their specifications. This service is offered at a pre-determined rate.

Sometimes the trucks are loaded with the cargo of other consignee in case there is empty space in the vehicle, during return journey. We believe that the provision of LTL services enables us to optimize capacity utilization.

Parcel Delivery Services

We provide parcel delivery services in the western and southern region of India, majorly from Mumbai, Vapi, Surat, Daman, etc. to Bangalore, Mysore, Hosur, Chennai and other southern regions. Customers may book consignments either at our offices, franchisees or at our agents' offices, following which the consignment is transported through our transshipment hub. Our parcel delivery service works as per the "Hub & Spoke" arrangement where the entire load is transported to our central warehouse in Mumbai, which is the transshipment hub. The relevant parcels are segregated for faster freight movement, and finally distributed to specific locations. As part of our customer service initiative, in majority cases, we deliver the consignments at the doorstep of the customers.

Though our parcel business is not a time-bound service, we endeavour to deliver the parcels within a reasonable time frame. The safety of the consignment is a prime concern for us and in order to enhance customer satisfaction, we have started using containerized trucks, instead of using regular trucks, which keeps each parcel well protected from damage during transit.

Pricing and Payment Options

The pricing of our services in the goods transportation business is determined on the basis of the weight or volume of the relevant consignment and as well as the distance of the delivery point. We have three kinds of payment options as detailed below:

FTL and bonded trucking are generally ‘on-going accounts’ with a few opting for ‘to pay’ option for Parcel Booking Division (FTL income is not considered in the following options):

“Paid” Option

The customer pays the freight charges at the time of booking, under this option. The freight charges are mostly paid in cash or by various electronic payment methods. This facility enables us to realize revenue on immediate basis from the customers. Generally this option is used for the walk-in customers, in order to avoid risk of loss of income. Also, this payment option is utilised mainly in the Parcel delivery service.

“To Pay” Option

The customer does not pay the charges at the time of booking under this option; instead the person to whom the goods are delivered (i.e. consignee) is required to pay the freight charges at the time of collection of the goods. This payment option is the most preferred option by our customers.

This payment option is popular among customers in the unorganized sector, particularly SMEs, distributors and traders. Although there is a risk of non-payment by the consignee, but in order to minimize the risk of default, we continue to retain possession of the consignment until payment.

The “To Pay” option is generally used in Parcel Delivery as well as some of our FTL / PTL customers.

Ongoing Accounts

Under this payment option, our services are provided to the customers on credit and we maintain an ongoing account of receivables from such customers. The customer is required to settle the account on a periodic basis. This facility is extended only to selected high-volume and regular customers, usually large enterprises. Due to deferred payment terms and comparatively higher credit Periods, this payment method is used only for FTL / PTL services and for Bonded Trucking services.

We have entered into arrangements of AMC with Ashok Leyland Limited and TATA Motors for annual maintenance of our trucks, thus keeping them fit for any future journeys as well increase their useful life. Further, as per the AMC contracts, in case of any disruption or breakdown in the trucks during the journey, the trucks can be repaired at their respective company outlets in any part of India.

Fuel

Our drivers are required to purchase fuel only from certain designated pumps during transit as we have arrangements with petrol pump stations at various locations across India, especially on the frequent routes of transportation used by us. We also have special fleet cards as an effective fuel management tool, issued by large oil companies which provide us with benefit points each time we purchase fuel from designated pumps, and these benefit points can be redeemed against subsequent fuel purchases. We also get price discount from the dealers of the authorised pumps from where we regularly purchase fuel for our vehicles.

The FDI Policy issued by the DIPP does not prescribe any cap on the foreign investments in the sector in which the Company operates. Therefore, foreign investment up to 100% is permitted in the Company under the automatic route. No approvals of the FIPB or the RBI are required for such allotment of equity Shares under this Issue. 11) EARNING PER SHARE

- a) Basic Earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average numbers of equity shares outstanding during the period are adjusted for events of bonus issue; bonus element in a rights issue to existing shareholders; share split; and reverse share split (consolidation of shares).
- b) For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

12) BORROWING COST

Borrowing costs that are attributable to acquisition or production of qualifying assets are capitalized as part of cost of such asset. Value in use is the present value of the estimated future cash flows expected to arise from the continuing use of the assets and from its disposal at the end of its useful life. For example, if a Bidder/Applicant has Bid for three options in the Bid cum Application Form and such Bidder/Applicant is changing only one of the options in the Revision Form, the Bidder/Applicant must still fill the details of the other two options that are not being revised, in the Revision Form. - c) In case of revision of Bids by RIIs, Employees and Retail Individual Shareholders, such Bidders/Applicants should ensure that the Bid Amount, subsequent to revision, does not exceed ₹ 200,000. In case the Bid Amount exceeds ₹ 200,000 due to revision of the Bid or for any other reason, the Bid may be considered, subject to eligibility, for allocation under the Non-Institutional Category, not being eligible for Discount (if applicable) and such Bid may be rejected if it is at the Cut-off Price. The Cut-off Price option is given only to the RIIs, Employees and Retail Individual Shareholders indicating their agreement to Bid for and purchase the Equity Shares at the Issue Price as determined at the end of the Book Building Process.
- d) In case the total amount (i.e., original Bid Amount plus additional payment) exceeds ₹ 200,000, the Bid will be considered for allocation under the Non-Institutional Category in terms of the RHP/Prospectus. If, however, the RII does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for shall be adjusted downwards for the purpose of allocation, such that no additional payment would be required from the RII and the RII is deemed to have approved such revised Bid at Cut-off Price.

- a) All Bidders/Applicants are required to make payment of the full Bid Amount (less Discount, if applicable) along with the Bid Revision Form. In case of Bidders/Applicants specifying more than one Bid Option in the Bid cum Application Form, the total Bid Amount may be calculated for the highest of three options at net price, i.e. Bid price less discount offered, if any.
- b) Bidder/Applicant may Issue instructions to block the revised amount based on cap of the revised Price Band (adjusted for the Discount (if applicable) in the ASBA Account, to the same Designated Intermediary through whom such Bidder/Applicant had placed the original Bid to enable the relevant SCSB to block the additional Bid Amount, if any.
- c) In case the total amount (i.e., original Bid Amount less discount (if applicable) plus additional payment) exceeds ₹ 200,000, the Bid may be considered for allocation under the Non-Institutional Category in terms of the RHP/Prospectus. If, however, the Bidder/Applicant does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for may be adjusted downwards for the purpose of Allotment, such that additional amount is required blocked and the Bidder/Applicant is deemed to have approved such revised Bid at the Cut-off Price.

5.6 BASIS OF ALLOCATION

- a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Bidders/Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP/Prospectus. For details in relation to allocation, the Bidder/Applicant may refer to the RHP/Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spill over from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/Applicants may refer to the RHP/ Prospectus.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table

below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer and the Selling Shareholders, in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the RHP/ Prospectus or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Offer therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the Application Form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/ Issue Opening Date.

In a fixed price Issue, allocation in the net Issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

For details of instructions in relation to the Application Form, Bidders/Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Bidders/Applicants other than Retail Individual Investors and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to RHP/Prospectus. No Retail Individual Investor will be Allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Investor Category and the remaining available shares, if any will be Allotted on a

proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Issue (excluding any Issue for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIIs

Bids received from the RIIs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIIs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIIs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIIs by the minimum Bid Lot (“**Maximum RII Allottees**”). The Allotment to the RIIs will then be made in the following manner:

- a) In the event the number of RIIs who have submitted valid Bids in the Issue is equal to or less than Maximum RII Allottees, (i) all such RIIs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIIs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b) In the event the number of RIIs who have submitted valid Bids in the Issue is more than Maximum RII Allottees, the RIIs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIIs

Bids received from NIIs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIIs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIIs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

- d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 07, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the Securities Act, and may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable U.S. state securities laws. Each member shall pay the amount of every call so made on him to the person or persons and at the time and place appointed by the Board of Directors. A call may be made payable by instalments. A call may be postponed or revoked as the Board may determine.

Notice of Calls

- 33 At least fourteen days' notice in writing of any call shall be given by the Company specifying the time or times and place of payment, and the person or persons to whom such call shall be paid.

Call to date from resolution

- 34 A call shall be deemed to have been made at the time when the resolution authorizing such call was passed at a meeting of the Board of Directors and may be made payable by the members whose names appear on the Register of Members on such date or at the discretion of the Directors on such subsequent date as shall be fixed by the Board of Directors.

Partial payment not to preclude forfeiture

Payment in anticipation of calls may carry interest

- 40 The Board of Directors may, if it thinks fit, subject to the provisions of Section 50 of the Act, agree to and receive from any member willing to advance the same, whole or any part of the moneys due upon the shares held by him beyond the sums actually called for and upon the amount so paid or satisfied in advance or so much thereof from time to time as exceeds the amount of the calls then made upon shares in respect of which such advance has been made, the Company may pay interest, at such rate, not exceeding, unless the Company in general meeting shall otherwise direct, twelve per cent per annum as the member paying the sum in advance and the Board of Directors agree upon. The Board of Directors may at any time repay the amount so advanced. Any such lien shall extend to all dividends payable and bonuses declared from time to time declared in respect of

PROVIDED THAT the Board of Directors may, at any time, declare any share/debenture to be wholly or in part exempt from the provisions of this Article.

Fully paid-up share shall be free from all lien and in the case of partly paid-up shares the Company's lien shall be restricted to moneys called or payable at a fixed time in respect of such shares.
